

Percon Delivers Maximum Value in New Industrial Vehicle Computer Products

Percon debuts its flagship product line: Phoenix 104 and 104e industrial computers

Percon re-joins the AIDC and industrial computer industries with their release of the Phoenix 104 and 10E vehicle computers. Percon's flagship product line of industrial vehicle or fixed mount computers are designed to operate in the harshest of environments.

The Phoenix 104 and 104E are Windows CE 6.0 rugged vehicle computer that provide high performance power in a compact and ergonomic form with maximum flexibility and durability in a range of extreme environments. In the warehouse, the yard, the freezer, or on the road, the Phoenix 104E provides the computing power and the communication functions to meet the requirements of to-day's demanding applications.

"Consumers have been requesting for a more affordable, durable and ergonomic mobile computers with a mid-sized display and Windows CE ®, and we've responded by introducing the Phoenix industrial line, making vehicle computing more usable and redefining today's market," said Robert Hougen, President, Percon, Inc. "Throughout our company, we have endeavored to give customers the best possible experience and most affordable product on the market."

The Phoenix industrial vehicle computers delivers functionality normally found in bigger VMTs but at a lower price point and smaller size. Features highlights of the product line are compact, small form, powerful 520 MHz PXA270 processor, WinCE 6.0 Operating System, 10.4" 430 nit color display, anti-glare touch screen, Cisco compatible 802.11n radio , temperature rated: -30° to +60°C, IP67 Sealing, browser & terminal emulation support, dual high volume speakers and a variety of peripheral connectivity.

"What makes Percon Phoenix product a better value? This is where we pull our data sheet on products and compare feature by feature. Doing this comparison makes us just as competitive as the next guy. In reality, if we average out all the features would be rank on top." stated James "Boony" Budniakiewicz, Vice-President, Sales and Marketing, Percon, Inc.

About Percon, Inc.

Percon is a recognized innovator in the AIDC/barcoding/RFID industries. Percon, Inc. engineers, manufactures, sells and distributes industrial computer products and solutions that comprise of fixed and vehicle computers for operations suited for the harshest of

environments. Application areas would include vertical industries such as warehousing, cold storage, transportation, military and public safety. Our technology includes our Phoenix flagship products; a one piece rugged IP 65 rated industrial vehicle computers. Our products are the results of over 90 years of AIDC experience plus they are complemented with the quality support service expected from the Percon legacy.
